SUMMARY

PMP-certified consultant with 4+ years of hands-on experience across data analytics and technology consulting. Specializes in leading project workstreams, building SQL and Python-driven solutions, and communicating complex data insights to business stakeholders

SKILLS & CERTIFICATIONS

Data & Analytics: PYTHON | SQL | RDBMS | Power BI (DAX) | Tableau | Excel (Pivot Tables & Macros) | Data Warehousing | ETL | Big Data Concepts | Cloud (Azure) | Algorithms & Data Structures |

Consulting & Delivery: Client Management | People Management | Stakeholder Management | Requirements Gathering | Solution Design | Agile/Scrum | Waterfall | UAT | Risk Mitigation | Jira | Visio | Root Cause Analysis | KPI Reporting

Platforms: SAP S/4HANA | Oracle EBS | SAP Ariba | Microsoft D365

Certifications: [PMP®](#) | [SAP S/4HANA Sourcing & Procurement](#) | [SAP ABAP Cloud](#) | [SAP Ariba](#) | [Python](#) | Microsoft Azure AZ-900 & DP-300

PROFESSIONAL EXPERIENCE

Amazon Robotics

Austin, TX

System Development/Technical Program Manager Co-op, Enterprise Systems

Jan 2025 – Dec 2025

- Led requirements gathering and solution design across 3 workstreams across ERP digital transformation, aligned Finance, Procurement, and Engineering on functional specifications adopted by the SI as their project baseline with zero missed milestones
- Diagnosed a \$1M+ cost misallocation by running SQL queries across RDBMS financial records for 300+ monthly transactions, traced the root cause to missing cost fields in the data pipeline, and built a validation layer that saved 500 hours of annual close work
- Built a PYTHON-backed automation to handle 400+ daily transactions that required manual data updates and 10 min/line, eliminating the process entirely and saving \$1.7M annually in headcount costs
- Developed an AI chatbot to resolve stuck purchase order approvals by automatically routing them to the correct approvers, reducing procurement support ticket volume by 15%

Wipro Limited

Bangalore, India

Sr. Technology Consultant, ERP Digital Transformation

Apr 2022 – Jun 2024

- Led Procure-to-Pay (P2P) implementation for GUVNL client across 7 government subsidiaries, ran requirement workshops with business stakeholders, shaped the solution design; cut the PO cycle from 8 to 3 days, closing a 2-year-old audit finding on go-live.
- Built a real-time SQL-driven payment aging dashboard providing visibility into \$1.8M of vendor obligations, reducing escalations 60% and recovering \$0.8M in early-payment discounts.
- Promoted to solution design lead across 3 client workstreams, leading 2 junior consultants drove delivery from requirement gathering through deployment, authoring 40+ functional specifications that reduced post go-live rework by 35%
- Developed a budget validation framework for client procurement workflows that automatically blocked non-compliant purchase orders, cutting quarterly budget correction errors by 20-30% within 60 days

HP Inc.

Bangalore, India

Business Analyst, Customer Support Solutions

Aug 2021 – Apr 2022

- Built KPI-driven Power BI dashboards tracking ticket volume, resolution time, and escalation rates for the customer support team, presented data insights to senior leadership, and improved average response time by 29%
- Redesigned NPI launch tracking in Jira across product, marketing, and operations, fixed cross-team coordination gaps, and cut time to market for HP printer launches by 6 weeks

EDUCATION

Purdue University - Master of Engineering Management (MEM), Industrial Engineering **GPA 3.7/4.0**

May 2026

Gujarat Technological University - Bachelor of Engineering - Mechanical Engineering **GPA 3.89/4.0**

Jun 2021

CAPSTONE PROJECTS

ClassPoint - Builder, AI Grading Tool

Feb 2026 – May 2026

- Designed and deployed an AI-powered grading pipeline in PYTHON that replaced a 2-hour manual evaluation process, saving 45+ hours per semester across 167 students

SunSpectra - Strategy Consultant, Manufacturing Optimization

Feb 2026 – May 2026

- Led a 5-person consulting team to analyze a manufacturing bottleneck, identified changeover as the main constraint, and presented a redesign to client stakeholders projected to improve throughput by 18% and cut changeover time by 25%

TVF Textile Firm - Operations Consultant, Supply Chain Optimization

Aug 2024 – Dec 2024

- Built a PYTHON-based forecasting model for freight cost planning that helped the client lock in favorable rates before market spikes, saving \$150K annually
